

ACCESSORIES

DOUBLE DOOR CO-ORDINATION

The double door coordination allows the two doors to open and close simultaneously, by just opening and closing only one of them.

This system can be installed retrospectively since the Eclisse system has a patented extractable track which can be removed to install the co-ordination mechanism without breaking into the wall.

- The cable has been specially developed by Eclisse for its strength and resistance to stretch over time. It is a 132 strand, 2mm stainless cable complete with a zinc plated 1.5mm spring.
- Including Soft Close system.
