

TELESCOPIC SYNCHRONIZATION SYSTEM

The synchronisation system opens and closes two double doors in the same direction.

As soon as you start opening the first door, the second door also starts opening and they progress together until fully opened with no damage, banging or bounce back.

The cable has been specially developed by Eclisse for its strength and resistance to stretch over time. It is a 132 strand, 2mm stainless cable complete with a zinc plated 1.5mm spring.
